Mumbai, India | +91 9823142618 | riteshkumarsingh36@apsit.edu.in | linkedin.com/in/riteshsingh | github.com/ritesh

PROFESSIONAL SUMMARY

Computer Science (AI & ML) engineering student with hands-on internship experience across cybersecurity operations, DevOps, and cloud automation. Skilled in implementing Zero Trust security architecture, CI/CD pipelines, and machine learning solutions, with a track record of delivering full-stack and ML-based projects and leading teams to hackathon wins.

TECHNICAL SKILLS

Programming Languages: Python, C, SQL, HTML/CSS

Cloud & DevOps: Jenkins, Docker, Google Cloud Platform (GCP), CI/CD Pipelines, Git, Linux

Cybersecurity: Zscaler (ZIA, ZPA, ZDX), Zero Trust Architecture, SentinelOne EDR, Endpoint Security, Network Traffic Analysis

Machine Learning & Data: Scikit-learn, pandas, NumPy, Matplotlib, NLTK, OpenCV

Databases & Tools: MySQL, Flask, Node.js, Express.js, VS Code, XAMPP

EXPERIENCE

Cybersecurity Intern — RockLadder

April 2026 – May 2026

- Support enterprise security operations across Zscaler ZIA, ZPA, and ZDX platforms, enabling secure remote access and real-time traffic inspection.
- Apply Zero Trust Architecture principles to strengthen application access controls and reduce the organization's attack surface.
- Monitor endpoint activity and threat alerts using SentinelOne EDR to detect and respond to potential security incidents.
- Analyze network traffic, user behavior, and performance metrics to identify anomalies and improve overall security posture.

DevOps & Cloud Intern — Larsen & Toubro (L&T)

Sep 2025 – Feb 2026

- Configured and maintained Jenkins CI/CD pipelines on Linux-based cloud infrastructure to streamline software delivery.
- Automated build and deployment workflows, reducing manual intervention and accelerating release cycles.
- Applied Git version control and DevOps best practices to improve team collaboration and code reliability.

PROJECTS

Hospital Management System | Node.js, Express, MySQL

Dec 2025 – Feb 2026

- Engineered a full-stack hospital platform to digitize clinical and administrative workflows.
- Implemented centralized patient records with role-based access control.
- Built OPD/IPD, EMR, lab, pharmacy, and billing modules into a single unified system.
- Integrated REST APIs with real-time updates for seamless data synchronization across modules.

Smart Crop Recommendation System | IoT, Python, ML

Jan 2025 – Mar 2025

- Built an IoT-based agricultural recommendation system using environmental sensors.
- Collected real-time soil and weather data to power an intelligent crop-prediction pipeline.
- Trained and deployed a machine learning model to recommend optimal crops.

Finance Fraud Detection System | Python, Scikit-learn, Flask

Dec 2024 – Feb 2025

- Developed machine learning models to classify fraudulent financial transactions.
- Performed data preprocessing and feature engineering to improve prediction accuracy.
- Built a Flask REST API to enable real-time fraud monitoring.

Automatic Face Attendance System | ML, OpenCV, MySQL

Oct 2024 – Dec 2024

- Designed an automated attendance system using facial recognition.
- Implemented a facial encoding and matching pipeline for accurate identity verification.
- Stored and organized attendance logs in MySQL for reporting and analysis.

EDUCATION

A.P. Shah Institute of Technology

Nov 2022 – July 2026

B.Engineering, Computer Science & Engineering (AI & ML) | CGPA: 7.5

BNN College

Sep 2019 – May 2021

HSC (Science) | Score: 86%

ACHIEVEMENTS

- Winner & Team Lead — Hackflash '25 (2025):** Led team to victory in APSIT's flagship hackathon.
- Finalist — Quasar 4.0 National Level Hackathon (2024):** Ranked among top finalist teams in a national-level competitive hackathon.
- Participant — Hackwave 24, All India Level (2024):** Collaborated with a national pool of students on rapid prototyping solutions.

POSITIONS OF RESPONSIBILITY

- AIMLSA — Content Co-Head (2024 – 2025):** Led content strategy and coordinated media planning for departmental events.
- OJUS 2024 — Publicity Co-Head (2023 – 2024):** Executed multi-channel publicity campaigns for the annual college festival.
